DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, 6-8, 9-18, drawn to a library of zinc finger polypeptide.

Group II, claim(s) 4-8, drawn to a set of libraries.

Group III, claim(s) 19-22, drawn to a method of making a library.

Group IV, claim(s) 23-25, drawn to a method of determining the presence of target nucleic acid molecule.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The library of zinc finger polypeptide recited in Group I lack the corresponding special technical features of Group II which requires said library to be in a set or array form i.e., a positional address for each of the components in a library and comprise of plurality of library besides the one recited in Group II. The features for Group I does not contain the other features of Group II. Group I and II lack a corresponding special technical features with Group III and Group IV since the latter two Groups are drawn to a method of making and determining for the presence of particular compound in the library. The method of Group III lack the

Art Unit: 1627

corresponding feature of Group IV since Group IV requires the additional step of determining for the presence of a target nucleic acid molecule, a feature that is lacking in Group III method of making the library.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

In Group I or Group II, elect:

A). Peptide species with or without a linker with modified residues in the peptide library (claim 9 or claim 14).

B). Peptide linker, Seq. ID. 6-7 (claim 15).

If Group III or Group IV is elected:

A). Consensus peptide species (claim 20)

B). Model Zinc finger e.g., Zif 268 or GLI or

Tramtrack, YY1.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a

Art Unit: 1627

claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 7-18 for Group I or II

Claims 20-21 for Group III or IV

The following claim(s) are generic: 1, 4, 19, and 23.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: each of the peptide species lacks the corresponding technical features in structure and/or results since one species is different from each of the other species in a modified peptide sequence contained in a library or set of libraries.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1627

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
